

ScanDrop²

UV/Vis Spectrophotometry

Maximum Flexibility in UV/Vis Spectrophotometry

ScanDrop²

A flexible, easy-to-use platform for measuring small volumes of 0.3 µl or more

- **Precise:** UV/Vis adsorption measurements between 220 nm to 1000 nm
- **Simple:** Easy handling - just pipette the sample and take your measurement
- **Compatible:** Interchangeable adapters available for standard cuvettes and microliter measurements with or without consumables
- **Modern:** Stand-alone operation from an integrated 10" tablet and/or PC
